

Starcart™ Utility Carts

Bushels? Why bushels?

The term bushels goes back hundreds of years for use in measuring grains and in the 20th century it became common to measure laundry in bushels. That term transferred to plastic utility trucks and is still commonly used today. A bushel is 2150 cubic inches or .035 cubic meters. Techstar has been manufacturing plastic carts since 1978.

Caster Pattern:

Mini Starcarts™

Bushels	Cubic Feet	Model No.	Casters	Base	Stocked Colours	Inside Dimensions (inches)	Outside Dimensions (inches)	Max Load (pounds)	Shipping Weight (pounds)
